RADIOPHYSICS AND QUANTUM ELECTRONICS
Volume 16, Numbers 1-12, 1973
(A translation of Izvestiya Vysshikh Uchebnykh Zavedenii Radiofizika)

Volume 16, Number 1 January, 1973

		Engl./Russ.
Excitation of Magnetoacoustic Waves in a Plasma Containing Nonequilibrium Ions – N. G. Sinitsa	1	5
Propagation of Electromagnetic Waves in an Abruptly Inhomogeneous Weakly Ionized Plasma – G. Kh. Kamenetskaya and M. S. Kovner	7	12
Kinetic Theory of Wave Reflection for Oblique Incidence of the Waves onto the Boundary of a Magnetically Active Plasma – A. N. Kondratenko	11	18
Synchrotron Radiation, the Adiabatic Invariant, and the Gradient Drift of Particles in a Linearly Nonuniform Magnetic Field – S. A. Kaplan, Kh. Orazberdyev, and V. Yu. Trakhtengerts	17	25
Certain Singularities of Particle Motion and Acceleration in a Linearly Nonuniform Magnetic Field with a Neutral Plane – Kh. Orazberdyev and V. Yu. Trakhtengerts	21	30
Examples of the Asymptotic Solution of the Problem of Determining the Average Time of First Attainment of the Boundary by a Multidimensional Markovian Process – I. K. Kostin and Yu. M. Romanovskii	26	36
Analysis and Optimization of Stochastic Filters – G. N. Bochkov and Yu. E. Kuzovlev	33	45
The Problem of the Frequency Spectrum of the Acoustic Field Scattered by a Uniformly Moving Rough Surface – A. B. Shmelev	40	54
Back-Scattering of a Scalar Wave Field by an Ideally Reflecting Object Situated near a Caustic Surface – G. V. Permitin	45	62
Transformation of the Wave Spectrum in a Medium Having Smooth Space-Time Fluctuations – V. G. Gavrilenko and N. S. Stepanov	50	69
Development of a Single Pulse in Microinhomogeneous Active Media – V. S. Chernov	60	82
Wave Corrections to the Transfer Equation for "Back" Scattering – Yu. N. Barabanenkov	65	88
Excitation of a Multilayer Dielectric Body of Rotation Having an Arbitrary Shape – E. N. Vasil'ev and L. B. Materikova	72	97
Radiation Patterns of a Dipole Situated near the End-Face of a Cylinder – E. N. Vasil'ev, A. A. Falunin, and A. I. Gorelikov	82	110
Fundamental and Parasitic Wave Modes of a Shielded Microstrip Line – L. N. Deryugin, O. A. Kurdyumov, and V. E. Sotin	89	118
A Charge in a Quantized Field of a Plane Wave – V. G. Bagrov, P. V. Bozrikov, and D. M. Gitman	97	129
The Formation of Helical Electron Beams in an Adiabatic Gun – A. N. Gol'denberg and M. I. Petelin	106	141
The Nonlinear Theory of a Relativistic Monotron – A. V. Smorgonskii	112	150
BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR		
The $2^3S_1 - 1^3S_1$ Photon-Plasmon Transition in Positronium – S. A. Kaplan and E. B. Kleiman	117	156

Investigation of the Cross-Polarization Characteristics of an Antenna by Means of Microwave Holography – V. A. Varganov, D. A. Dmitrenko, L. V. Dmitrenko, L. V. Dmitrenko, N. A. Dugin, L. K. Ivannikova, A. N. Savel'ev, V. I. Turchin, V. A. Farfel', and A. L. Fogel' 119 158

CHRONICLES

The Seventh All-Union Conference on Radio Astronomy – V. S. Troitskii 122 161

Volume 16, Number 2 February, 1973

Absorption and Amplification of Electromagnetic Waves in a Nonstationary Magnetically Active Plasma with Allowance for Space Dispersion – A. I. Avrov and S. A. Smolyanskii 125 171

Physical Interpretation of the Diurnal Variation of the TM- and TE-Components of Ultra-Longwave Fields in the Far Zone – G. F. Remenets and V. I. Leonov . . 133 181

Parametric Excitation of Langmuir Oscillations in the Ionosphere in a Field of Powerful Radio Waves – V. V. Vas'kov and A. V. Gurevich. 138 188

Two-Position Scattering of Radio Waves by the Sea Surface at Small Glancing Angles – A. I. Kalmykov, A. S. Kurekin, I. E. Ostrovskii, and V. V. Pustovoitenko 146 199

Transitions between Zeeman Sublevels of an Atom in a Medium – I. M. Oiringel' 152 206

Kinetic Equations for a Multilevel Spin System with Allowance for Magnetic Dipole Interaction between Spins – L. L. Buishvili and G. A. Volgina 155 209

Concerning the Influence of External Self-Focusing on the Operation of Laser Amplifiers – S. N. Vlasov, A. I. Makarov, and A. I. Khizhnyak 161 217

Dynamics of a Two-Frequency Self-Excited Oscillator with "Stiff" Excitation – T. M. Tarantovich and V. M. Khon'kin 165 222

The Effect of Phase Fluctuations of the Received Radiation on the Operation of a Synthesized Antenna – V. I. Turchin, A. L. Fogel', and G. A. Sharonov. 169 227

A Quasioptical Oscillator which Produces Diffracted Radiation – I. M. Balaklitskii, I. D. Revin, B. K. Skrynnik, A. S. Sysoev, O. A. Tret'yakov, and V. P. Shestopalov 175 235

Correlation of the Shift of the Center of Gravity of a Focused Light Beam in a Turbulent Atmosphere – E. I. Gel'fer, A. I. Kon, and A. M. Cheremukhin. . . . 182 245

The Possibility of Comparing Fields of a Wide Wave Beam in a Smoothly Inhomogeneous Medium with the Field of the Beam in Vacuum – G. V. Permitin . 188 254

Method of Measuring the Parameters of Axisymmetric Mirror Antennas According to the Radiation of a "Black" Disk Situated in the Fresnel Zone – D. A. Dmitrenko and V. V. Anikina 194 262

Analysis of the Static Modes of a Magnetron with Allowance for the Electron Velocity Scatter – V. E. Belov, L. V. Rodygin, and A. D. Yunakovskii 209 281

Nonlinear Theory of a Ubitron – M. I. Petelin and A. V. Smorgonskii 219 294

Effect of a Powerful Electromagnetic Wave on the Electrical Conductivity of a Semiconductor – V. I. Puchkov and E. M. Epshtein 227 305

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR

Effect of Field Nonuniformity on the Natural Width of a Laser-Spectral Line – A. N. Malakhov and M. S. Sandler 230 308

Application of the Equation for the Diffusion of Rays to Describe Light-Intensity Fluctuations in a Randomly Inhomogeneous Medium – N. V. Zubareva 232 310

Concerning the Reflection of Pulsed Signals from a Moving Mirror – A. V. Manankova and V. V. Borisov 234 312

Volume 16, Number 3 March, 1973

Search for Sporadic Radio-Emission from Cosmic Space at Centimeter and Decimeter Wavelengths — V. S. Troitskii, A. M. Starodubtsev, L. N. Bondar', M. R. Zelinskaya, K. M. Strezhneva, M. S. Kitai, and A. I. Sergeeva 239 323
Complex Radiation Effects for Moving Sources in a Plasma — Yu. M. Sorokin 253 342
Nonstationary Radiation from Dipole Sources in a Plasma Having a Diagonal Permittivity Tensor — N. G. Denisov, V. P. Dokuchaev, and V. V. Tamoikin 260 351
Spreading of Concentration and Temperature Perturbations in a Plasma in a Magnetic Field — S. B. Biragov 266 358
Synchronism in Molecular Biaxial Single Crystals of Methanitroaniline and Anesthesin Single Crystals — N. A. Vlasenko, B. L. Davydov, and L. G. Koreneva 270 363
Shaping of an Ultrashort Light Pulse in a Ruby Laser with Resonance-Loss Modulation — G. V. Krivoshchekov, N. G. Nikulin, V. A. Smirnov, and R. I. Sokolovskii . . 275 369
A Two-Level System in a Nonmonochromatic External Field — B. A. Zon and B. G. Katsnel'son 280 375
Width of the Stationary Lasing Spectrum of a Laser Having a Spectrally Inhomogeneous Solid Working Substance — I. I. Motorin and Ya. I. Khanin 289 386
Mechanism of the Synchronization of Thompson Systems for a Low Amplitude of the External Input — V. N. Detinko and M. N. Merzlyakova 294 393
The Effect of a Load on the Synchronization of an Oscillator — V. I. Korolev 299 399
Quasiperiodic Oscillations in a Nonautonomous Oscillator — V. I. Korolev and N. I. Miller 306 407
Approximate Investigation of the Dynamics of a Pulsed Phase-Shift Automatic Frequency Control System — A. S. Alekseev, E. V. Prokof'ev, and M. A. Chubarov 310 412
Frequency Correlation of Scintillations — V. I. Shishov 319 423
Statistics of Photoreadings for the Propagation of Light in a Turbulent Medium — A. S. Gurvich and V. I. Tatarskii 328 434
Thermal-Electric Fluctuations in a Medium Having a Nonlinear Conductivity under the Condition of Quasistationarity — R. L. Stratonovich 332 439
Electromagnetic Excitation of a Periodic Structure Having a Channel — V. A. Berezhnoi, G. V. Voskresenskii, and A. I. Plis 340 449
The Radiation-Transfer Equation with Allowance for Longitudinal Waves — L. A. Apresyan 348 461
A Zero Method of Measuring the Complex Reflection Coefficient in the Shortwave Portion of the Millimeter Range of Wavelengths — K. A. Goronina and R. K. Belov 357 473

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR

A Broadband Radiometer for the 4-mm Range of Wavelengths Which Is Based on Semiconductor Devices — N. R. Khachatryan, A. G. Kislyakov, Yu. V. Lebskii, and V. L. Rakhlin 360 477
Detector for the Submillimeter and Infrared Ranges Based on the Heating of Electrons in a Superconductor — A. M. Selyantsev and E. V. Klishin 363 479
Differential Equation with Periodic Transformations of the Arguments — I. Ya. Viner. 365 481

Volume 16, Number 4 April, 1973

Test for Detection of the Fine Structure of the Solar-Wind Velocity – N. A. Lotova and I. V. Chashei 369 491
Experimental Investigation of Fluctuations of Microwave Signals during Propagation above the Sea at Small Glancing Angles – I. D. Gontar', N. A. Dorfman, I. S. Turgenev, and V. F. Shul'ga 378 502
Propagation of Radio-Waves in Stratified Media – M. V. Tinin 381 505
Concerning a Certain Type of Transition Radiation – V. L. Ginzburg 386 512
Concerning the Interference of Transition Radiation for Incidence of Particles on an Ideally Conducting Surface – I. N. Arutyunyan 390 517

Concerning the Solutions of Certain Difference Equations Which Describe the Transformation of the Time Characteristics of Laser Radiation – T. I. Kuznetsova 394 521
Influence of a Reflected Signal on the Operation of a Laser – I. L. Bershtein 398 526
Detection and Measurement of Small Back-Scattering of Laser Radiation – I. L. Bershtein and D. P. Stepanov 402 531
Stability of a Single-Frequency Laser – N. D. Milovskii 407 537
Experimental Investigation of Fluctuations of the Difference Frequency of a Ring Laser – N. A. Markelov, V. A. Rogachev, and A. A. Turkin 413 545
Effect of the Stochastic Properties of Radiation on the Shape of the Absorption Spectrum – Yu. S. Oseledchik and E. I. Dubavskii 419 552
Determination of the Average Time Required for a Two-Dimensional Markovian Process to Reach Its Boundaries – V. D. Razevig 428 563
Selective Properties and Shape of a Pulse Signal That Has Passed through a Statistically Inhomogeneous Layer of Arbitrary Thickness – L. M. Erukhimov, I. G. Zarnitsyna, and P. I. Kirsh 436 573
Average Intensity of a Normal Wave in the Presence of Superrefraction – M. B. Kanevskii 442 581
Theory of Transition Radiation in a Waveguide Having a Piecewise-Homogeneous Dielectric Filler – K. A. Barsukov, É. A. Begloyan, É. D. Gazazyan, and É. M. Laziev 446 586
Effect of a Dielectric Coating on Currents in an Underground Antenna – E. L. Silakov . 452 594
Longitudinal Motion of Particles in a Storage Ring in Induced Fields Which Depend on the Radius – V. P. Kozin and A. M. Shenderovich 456 599
Experimental Investigation of the Velocity Spread in Helical Electron Beams – E. G. Avdoshin, L. V. Nikolaev, I. N. Platonov, and Sh. E. Tsimring 461 605
Concerning the Interaction of a Relativistic Electron Beam with a Plasma in a Waveguide – V. E. Nechaev 467 613
Theory of Gyrotrons with a Nonfixed Structure of the High-Frequency Field – V. L. Bratman, M. A. Moiseev, M. I. Petelin, and R. É. Érm 474 622

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR

Radiation of Electromagnetic Waves by a Directional Rotating Particle Source – V. Ya. Éidman 481 631
Excitation of Quadrupole Spin Echo by a Single Pulse for a Two-Frequency Action – N. E. Ainbinder 484 633
A Backward-Wave Parametric Oscillation Which Is Excited by Noise Pumping – K. I. Volyak and A. S. Gorshkov 486 635
Concerning the Possibility of Measuring the Absolute Humidity of Gases at Low Pressures – Yu. A. Dryagin and V. V. Parshin 490 638
Calculation of the Natural Frequencies and Self-Fields of a Rectangular Cavity Resonator Containing a Dielectric Sphere – V. A. Safaryan 492 640

Volume 16, Number 5 May, 1973

This is a special issue, containing papers presented at the Seventh All-Union Conference on Radio Astronomy, June 19-24, 1972, Gor'kii. Papers not published in this issue will be published in the Nos. 9 and 12 issues of 1973.

Development of Structural-Design Methods for Increasing the Efficiency of Fully-Steerable Parabolic Antennas – A. G. Sokolov and V. S. Polyak 495 655
Optical Simulation of the Radiation Pattern of Variable-Profile Antennas Operating in a Hartmann–Iris Mode – A. N. Korzhavin and V. M. Spitkovskii 500 661
Alignment Procedure and Fabrication Technology for the Antennas of the RTI-7.5/250 Radio Telescope of the Moscow Engineering College (MEC) – A. A. Parshchikov, B. A. Rozanov, V. S. Sagatelov, and A. A. Tanygin 503 665

Determination of the Polarization Characteristics of the Large Pulkovo Radio Telescope – N. A. Esepkina, N. S. Bakhvalov, L. G. Vasil'eva, N. S. Soboleva, and A. V. Temirova 506 669
Parameters of the Antenna of the RT-22 Radio Telescope at the Crimean Astronomical Observatory at Wavelengths of 3 and 1.35 cm – L. D. Bakhrakh, M. I. Grigor'eva, V. A. Efanov, L. R. Kogan, V. I. Kostenko, L. I. Matveenko, I. G. Moiseev, and Yu. G. Monin 511 675
Numerical Realization of the Algorithm for Restoration of Radio Images Using the Example of the Radio-Brightness Distributions of the Crab Nebula (the One-Dimensional Case) – V. I. Kostenko 515 680
Masers for Radio-Astronomy Investigations at Wavelengths of 0.8 and 1.35 cm – V. I. Zagatin, G. S. Misezhnikov, and V. B. Shteinshleiger 519 685
Broadband Parametric Amplifiers for the 8-mm Band of Wavelengths – V. V. Korogod, Yu. A. Militskii, I. A. Strukov, and V. S. Étkin 522 688
Radiometers for the Centimeter Band Which Are Based on Semiconductor Elements – V. M. Bogod and D. V. Korol'kov 525 691
A 20-Channel Spectrometer for the Wavelength Band from 1.7 to 2.6 mm – A. B. Burov, A. G. Kislyakov, A. A. Krasil'nikov, M. S. Kozlov, A. I. Naumov, and V. G. Ryskin 528 695
Concerning Broadband Antenna Amplifiers with a Low Level of Combinational Interferences – A. V. Men', V. P. Bovkun, and K. A. Babenkov 531 698
System for Automating Observations Using the RTI-7.5/250 Radio Telescope at the Moscow Engineering College – A. A. Parshchikov, B. A. Rozanov, and V. S. Sagatelov 535 703
Optimal Storage Time in Interferometers Having an Ultralong Base – L. R. Kogan 538 707
A Low-Frequency Output Device for a Radio-Astronomy Receiver with a Synchronous Integrator – A. V. Ipatov and A. B. Berlin 542 712
A Low-Frequency Output Device for a Modulation Radiometer – V. A. Prozorov 545 716
Observations of the Fluctuations of Solar Radio-Emission Flux at the 3.2 cm Wavelength – O. G. Gontarev 548 719
Measurement of the Frequency Spectrum of Solar Radio Emission in the 6200-7100 MHz Range – I. F. Belov, L. A. Vaulina, E. K. Divakova, M. M. Kobrin, A. I. Korshunov, E. I. Lebedev, Yu. S. Nedeshev, and B. V. Timofeev 551 723
Proton Flares and Noise Storms – L. S. Levitskii 554 727
New Estimate of the Altitude of Local Sources of the Slowly Varying Component of Solar Radio Emission at the 3.2-cm Wavelength – V. N. Borovik, G. B. Gel'freikh, and B. I. Lubyshev 558 731
Certain Possibilities of Statistical Analysis for the Investigation of the B- and S-Components of Solar Radio Emission – S. I. Arbuzov, A. I. Korshunov, and V. M. Fridman 563 737
Turbulent Acceleration of Electrons in Sources of Moving Radio-Bursts of the IV Type – V. V. Zaitsev 567 742
Quasiperiodic Components with Periods of from 30 to 60 min in the Fluctuation Spectra of Solar Radio Emission at the 3-cm Wavelength – V. I. Aleshin, M. M. Kobrin, and A. I. Korshunov 571 747
Distribution of the Radio-Brightness of the Galactic Background in the Decameter Range of Radio Waves – I. N. Zhuk 577 754
Investigation of the Cosmic-Background Radio Emission at a Frequency of 10 MHz – A. V. Antonov 581 759
The Polarization Characteristics of the Radio Emission of the Pulsars CP 0950 and CP 1133 at the 3.5-cm Wavelength – Yu. I. Alekseev 585 762
The Results of Observations of Discrete Sources at the 2-cm Wavelength at the Pulkovo Observatory – V. M. Bogod, O. A. Golubchina, V. G. Mirovskii, T. B. Pyatunina, N. S. Soboleva, I. A. Strukov, and P. A. Fridman 588 765

Preliminary Results of Observations of the Nebula in Orion at Submillimeter Wavelengths – A. N. Kislyakov, V. G. Listvin, V. I. Chernyshev, and A. S. Shvetsov 595 774
Two More Compact HII-Regions – Yu. N. Pariiskii and Yu. I. Glushkov 598 778
Radio-Brightness Distribution in the Crab Nebula at Wavelengths in the Centimeter and Millimeter Ranges – L. I. Matveenko 600 781
Detection of Hot Gas in the "Coma Berenices" Galactic Cluster – Yu. N. Pariiskii 602 784
Radio Emission from the Remnant of the Supernova Cassiopeia-A – K. S. Stankevich, V. P. Ivanov, S. A. Pelyushenko, V. A. Torkhov, and A. N. Ivannikova 603 786
Observations of Sources of Maser Radio Emission Having an Angular Resolution of 0.2 msec of Arc – B. F. Burke, K. D. Johnston, V. A. Efanov, B. D. Clark, L. R. Kogan, V. I. Kostenko, C. W. Low, L. I. Matveenko, I. G. Moiseev, D. M. Moran, S. H. Knowles, D. K. Papa, G. D. Papadopolous, A. I. Rogers, and P. R. Schwartz. 613 799
On a Certain Method of Observing Differential Refraction – I. F. Belov and V. M. Fridman 617 803
Concerning the Fluctuation Characteristics of the Earth's Troposphere – A. A. Stotskii . 620 806
Lev Leonidovich Myasnikov (Obituary) 623 810

Volume 16, Number 6 June, 1973

Interaction of Parametrically Coupled Waves in Nonequilibrium Media (Review) – M. I. Rabinovich and V. P. Reutov 625 815
The Relationship between the Anomalous Absorption of Radio Waves during Periods of Sudden Ionic Perturbations and the Zenith Angle of the Sun – V. V. Belikovich and E. A. Benediktov 644 840
Concerning the Theory of Electromagnetic Waves in a Nonuniform Moving Magnetically Active Plasma – V. G. Gavrilenko and L. A. Zelekson 647 845
The Problem of Passage of Pulses through an Inhomogeneous Plasma Medium – Yu. M. Zhidko 652 852
Excitation of Electromagnetic Waves Propagating in a Cold Plasma along a Magnetic Field by Means of a Beam of Phased Oscillators – A. B. Kitsenko and V. I. Panchenko 657 859
Radiation of Longitudinal Waves by a Charge in an External High-Frequency Electric Field in a Magnetically Active Plasma – T. L. Tavdgiridze 665 869
Small-Scale Inhomogeneities of the Intermediate-Latitude E_s-Layer – L. M. Erukhimov, V. V. Pisareva, and V. P. Uryadov 670 875
Altitude Distribution of O^+ and H^+ Ions in the Ionospheric F2-Region. I – M. G. Deminov and Yu. S. Sitnov 673 878
Reflection of Powerful Radio Waves from the Lower Ionosphere – I. M. Vilenskii and V. V. Plotkin 680 886
The Dispersion Characteristic of a Three-Mode Gas Laser for Modulation of the Relative Excitation – M. L. Kats, L. A. Mel'nikov, V. A. Sedel'nikov, and V. V. Tuchin. 684 892
Optimal Focusing of the Pumping in Single-Resonator Parametric Light Oscillators – M. M. Sushchik and G. I. Freidman 689 898
The Equivalent-Q Method for Investigating Multiple-Tuned Self-Oscillatory Systems – O. V. Makharinskii and I. N. Minakova 693 903
Spectrum of the Fluctuations of a Random Process Which is Caused by Diffusion in a Medium in the Presence of an Electric Field – A. G. Slavnov. 698 909
The Frequency Spectra of Strong Fluctuations of Laser Radiation in a Turbulent Atmosphere – A. S. Gurvich and Vl. V. Pokasov 701 913
Correlation of the Level and Phase of the Field in a Spherical Waveguide Channel Having a Random Boundary – V. G. Bezrodnyi 705 918

On the Role Played by Convergent Waves in the Solution of the Problem of Diffraction by a Bounded Body – I. L. Landsberg 712 927
Concerning the Distribution of a Monochromatic Electromagnetic Field and of the Temperature in a Plane Conductor with a Temperature-Dependent Conductivity – R. S. Kuznetskii 719 936
A Rectangular Waveguide Loaded by a Semiinfinite Chain of Ferrite Spheres – V. M. Ushakov and N. A. Khizhnyak 723 942
The Phase Characteristics of a Rectangular Waveguide Containing Symmetrically Placed Transversely-Magnetized Ferrite Layers – B. Yu. Kapilevich and T. N. Fedotova 729 950

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR
The Modulation Method of Tuning a Laser Oscillator Based on Rb^{87} – M. P. Bespalova, A. I. Pikhtelev, and Yu. V. Timofeev. 733 956
On Microwave Breakdown in n-InSb – V. I. Piskarev 735 957
Instability of a Brillouin Beam of Electrons in a Waveguide Having an Impedance Wall – V. E. Nechaev and M. I. Fuks 738 960
Concerning the Applicability Boundaries of the Delano Model for Describing the Process of Wave Scattering from a Body Having a Complex Shape – E. A. Shtager. 741 962

Volume 16, Number 7 July, 1973

Magnetohydrodynamic Waves in the Plasma of the Solar Wind – I. N. Toptygin. 745 971
Refraction of Plasma Waves in the Ionosphere (in Connection with Sounding of the Ionosphere from above) – B. N. Gershman, A. E. Krupina, and Yu. Ya. Yashin. 753 981
A Current Mechanism for the Formation of Inhomogeneities Which Lead to the Diffuseness of the F-Region of the Ionosphere at High Latitudes – B. N. Gershman and G. Kh. Kamenetskaya 759 988
Raman Scattering of Microwave Radiation in a Bounded Solid-State Plasma – V. V. Petrov 766 997
Dynamics of a Laser Oscillator Having a Resonator with a Controllable Q – N. V. Roshchin 773 1006
Stationary Solutions of the Wave Equation in a Medium with Nonlinearity Saturation – N. G. Vakhitov and A. A. Kolokolov 783 1020
Stability of Periodic Modes in n-Tuned Interacting Oscillators Having a Nonlinear p-n-Junction – B. D. Donevski and D. D. Bainov. 790 1029
Investigation of Pulsed Self-Oscillations in Nonlinear Active Wave Systems – Yu. K. Bogatyrev and V. V. Papko. 795 1035
A Method of Reducing the Effect of Interference on the Operation of a Correlation Interferometer – A. T. Gavrilin and A. A. Gorbachev 799 1040
The Projection Method in the Problem of Exciting a Dielectric Antenna – V. V. Nikol'skii and G. D. Malushkov. 803 1045
The Hybrid Method of Calculating Field Fluctuations in a Medium Having Large and Small Random Inhomogeneities – A. G. Vinogradov and Yu. A. Kravtsov. 811 1055
The Effect of Intensification of Back Scattering by Bodies That Are Situated in a Medium Having Random Inhomogeneities – A. G. Vinogradov, Yu. A. Kravtsov, and V. I. Tatarskii. 818 1064
Convergence of Perturbation-Theory Series in the Problem of Propagation of Short Waves in a Randomly Inhomogeneous Medium – Yu. N. Barabanenkov. 824 1071
Amplitude and Phase Modulation of Light by Ultrasound – A. M. Martynov. 830 1079
Energy of an Equilibrium-Fluctuational Electromagnetic Field in a Medium – Yu. S. Barash. 836 1086
The Dispersion Properties of a Chain of Cavity Resonators with Narrow Slits – Kh. L. Garb, G. V. Pochikaev, and P. Sh. Fridberg. 847 1100

Investigation of the Conditions Governing the Formation of a Plasma-Beam Discharge with No Magnetic Field — V. P. Popovich, T. A. Novskova, I. F. Kharchenko, and E. G. Shustin. 854 1109

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR

Nonlinear Transformation of Electromagnetic Waves on the Boundary of a Magnetically Active Plasma — A. N. Kondratenko and V. G. Shaptala 862 1118

Analysis of the Structure of a Shock Wave by Means of the Averaging Method — E. N. Pelinovskii and A. S. Pitum 865 1120

Modulator of Radiation in the Millimeter Range Based on Interband Breakdown in p-InSb — V. A. Valov, L. S. Mazov, and V. I. Piskarev. 867 1122

Certain Results of Using Diodes with a Schottky Barrier in the Mixers of Radiometers Operating in the Range of Wavelengths from 0.9 to 3.8 mm — V. N. Voronov, A. D. Ginzburg, A. I. Naumov, D. G. Pavel'ev, V. M. Uskova, L. I. Fedoseev, and A. A. Shvetsov. 870 1125

Volume 16, Number 8 August, 1973

Certain Statistical Characteristics of Sudden Ionospheric Perturbations and the Distribution of Geoactive Chromospheric Flares over the Solar Disk — V. V. Belikovich and E. A. Benediktov 873 1133

The Kinetic Theory of Electromagnetic Waves in an Electron Plasma Having Slowly Varying Parameters — V. D. Pikulin and N. S. Stepanov 877 1138

Shift of the Reflection Point in an Inhomogeneous Plasma Due to the Action of an Incident Wave — G. M. Fraiman 883 1146

Particle Fluxes along the Lines of Force of a Magnetic Field in a Multicomponent Ionospheric Plasma in the Presence of Longitudinal Currents — M. G. Deminov, Yu. S. Sitnov, and M. N. Fatkullin 889 1154

Measurement of the Brightness Temperature of the Atmosphere in the Submillimeter Range of Wavelengths — F. F. Igoshin, A. P. Kir'yanov, A. F. Kuzenkov, V. V. Mozhaev, V. V. Rudakov, M. A. Tulaikova, and A. A. Sheronov 894 1160

Character of the Redistribution of Charged Particles in the Night E-Region at Intermediate Latitudes — Yu. A. Ignat'ev, Z. N. Krotova, V. P. Nesterov, and Yu. K. Chasovitin 897 1164

Theoretical and Experimental Investigations of the Coefficients of Reflection from Vegetation Covers at Small Glancing Angles — B. A. Red'kin, V. V. Klochko, and Zh. G. Ocheret 903 1172

Theory of the Polarization of Nuclei for Saturation of Allowed and Forbidden Resonances — L. I. Buishvili and A. A. Davitulianai 906 1176

Instability of a Layer of Transparent Liquid in a Field of Intense Light Radiation — A. I. Bozhkov 911 1183

Parametric Amplification and Generation of Pulses in Nonlinear Distributed Systems — K. A. Gorshkov, L. A. Ostrovskii, and V. V. Papko 919 1195

Open Coupled Cavity Resonators — V. S. Averbakh, S. N. Vlasov, and L. V. Piskunova 927 1205

Width of the Spectral Lines of an N-Mode System Which Has an Equidistant Spectrum of Natural Frequencies and Operates in a Self-Synchronous Mode — A. N. Malakhov and A. A. Mal'tsev 932 1211

Local Maxima of a Random Field above a Stipulated Level — Yu. I. Khramtsov 940 1221

Van-der-Waals Interaction between Anisotropic Bodies — Yu. S. Barash 945 1227

Determination of the Mean-Square Amplitude of a Wave in a Medium Having Large-Scale Inhomogeneities — A. A. Fraiman 950 1235

Theory of Wave Propagation in a One-Dimensional Randomly Inhomogeneous Medium — Yu. A. Ryzhov 954 1240

Propagation of Short Waves in a Randomly Inhomogeneous Medium Having an Arbitrary Law Governing the Permittivity Fluctuations – Yu. N. Barabanenkov . 961 1249
Diffraction of an Electromagnetic Wave by a Metallic Cylinder Surrounded by a Plasma Layer – A. Sh. Kovner 964 1253
Magnetic Field of a System Consisting of a Current-Carrying Turn and a Sphere That Travels through it – V. N. Krasil'nikov and G. V. Mogilnikov 969 1260
Experimental Determination of the Parameters of the Field in the Aperture of a Sectorial Horn by Means of a Passive Probe – A. V. Filippov and V. A. Andreev . 973 1265
Interaction of Cyclotron Waves of a Multivelocity Electron Beam with Electrodynamic Systems – V. A. Vanke and S. P. Kryukov 978 1271
An Approximate Nonlinear Theory of an Orotron – V. A. Isaev, D. I. Trubetskov, and V. N. Shevchik 983 1277

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR
Concerning the Resolving Power for Image Conversion in a Nonlinear Crystal – Yu. A. Il'Inskii and V. M. Petnikova 989 1285
The Equations for the Linear Transformation of Nongaussian Random Quantities, Processes and Fields – A. N. Malakhov 992 1287
Detection of Submillimeter Radiation by Means of W–Ge–Ni Point Contacts – E. P. Bogdanov, V. I. Koptenko, L. I. Fedoseev, and V. N. Shabanov 995 1290
Letter to the Editor – V. V. Bodrov and A. F. Chaplin 997 1292

Volume 16, Number 9 September, 1973

This is a special issue, containing papers delivered at the Seventh All-Union Conference on Radio-astronomy, June 19-24, 1972, at Gor'kii.

On the Seventieth Anniversary of the Second Congress of the Russian Social Democratic Workers Party. 999 1304
Measurement of the Angular Dimensions of the Radiosource Cassiopeia-A at a Frequency of 9 MHz by an Independent-Reception Radiointerferometer Having Bases of 1.5 and 7 km – V. A. Alekseev, M. A. Antonets, E. N. Vinyaikin, S. A. Volokhov, É. D. Gatelyuk, P. S. Zhivora, B. S. Ivanov, S. A. Kamenskaya, A. E. Kryukov, G. R. Pashkova, A. S. Sizov, A. I. Teplykh, V. S. Troitskii, A. I. Chikin, and M. B. Yankavtsev. 1001 1307
Measurements of the Angular Dimensions of Discrete Radiosources by Means of an Independent-Reception Interferometer Operating at 408 MHz with a Resolution of 0.1 Angular Seconds – V. A. Alekseev, M. A. Antonets, I. F. Belov, A. A. Varypaev, E. D. Gatelyuk, V. A. Efanov, B. N. Lipatov, I. G. Moiseev, S. M. Mkrtchyan, V. A. Sanamyan, A. S. Sizov, V. S. Troitskii, B. V. Shchekotov, and A. I. Chikin. 1007 1314
Measurements of the Angular Dimensions of Discrete Sources by Means of an Independent-Reception Interferometer at a Frequency of 25 MHz Using the Grakovo–Zimenki Base – S. A. Volokhov, É. D. Gatelyuk, P. S. Zhivora, B. S. Ivanov, V. A. Alekseev, M. A. Antonets, S. Ya. Braude, E. N. Vinyaikin, S. A. Kamenskaya, A. E. Kryukov, P. A. Mel'yanovskii, A. V. Men', A. S. Sizov, A. I. Teplykh, V. S. Troitskii, A. I. Chikin, and M. V. Yankavtsev. 1011 1318
Initial Results of Measurements Performed on a Radiointerferometer Having Retranslation Which Operates in the Meter Range ($\lambda = 3.5$ m) – V. V. Vitkevich, G. I. Dobysh, V. S. Artyukh, R. D. Dagkesamanskii, B. K. Izvekov, S. A. Sukhodol'skii, and V. A. Frolov. 1013 1320
Linear Polarization of Galactic Radioemission at the Frequency 210 MHz – P. A. Kapustin, A. A. Petrovskii, L. V. Pupysheva, and V. A. Razin 1017 1325
Certain Results of Measurements of the Region at the Center of the Galaxy in the Millimeter and Meter Wavelength Ranges – V. I. Ariskin, I. I. Berulis, V. N. Brezgunov, R. D. Dagkesamanskii, R. L. Sorochenko, and V. A. Udal'tsov 1024 1334

Observations of Markaryan Galaxies at a Wavelength of 75 cm – P. Thomasson and V. H. Malumian 1030 1342
Investigation of the Probability Density of the Signal from Interstellar Hydroxyl Radiolines – M. I. Pashchenko, G. M. Rudnitskii, and V. I. Slysh. 1032 1344
Fluctuations of Solar Radioemission at the 3-cm Wavelength Using Two Radiotelescopes That Are Spaced 1500 km Apart – M. M. Kobrin, V. V. Pakhomov, M. S. Durasova, B. V. Timofeev, N. A. Prokof'eva, E. I. Lebedev, and G. A. Lavrinov 1036 1350
An Attempt at Experimental Detection of the Correlation between Variations of the Chromosphere Altitude and Fluctuations of the Flux of 3-cm Solar Radioemission – N. S. Kaverin, V. V. Pakhomov, and Yu. V. Platov. 1040 1354
The Spectrum of Low-Frequency Oscillations of the Magnetic Field of Sunspots, and Low-Frequency Modulation of the Radioemission from the Active Regions of the Sun – É. I. Mogilevskii, V. N. Obridko, and B. D. Shel'ting. 1043 1357
The Spectral Index and Fluctuations of Solar Radioemission at the $\lambda \approx 3$ cm Wavelength – I. I. Berulis, A. P. Molchanov, V. P. Olyanyuk, I. E. Pogodin, O. Ya. Pudov, N. G. Franchuk, and L. V. Yasnov 1047 1362
Preliminary Results of Investigating the Spectrum of Solar Radioemission Fluctuations with Almost-Continuous Coverage of the Diurnal Interval – A. B. Berlin, G. B. Gel'freikh, V. G. Zandanov, A. N. Korzhavin, and L. E. Treskova. 1050 1366
The Problem of Reconstructing the Solar Radiobrightness Distribution – S. D. Kremenetskii, L. M. Risover, and G. Ya. Smol'kov 1053 1369
The Darkening Ring in the Solar Radiobrightness Distribution at the $\lambda = 3$ cm Wavelength (Polar Region) – I. I. Berulis, A. S. Grebinskii, O. V. Korobchuk, N. G. Franchuk, and L. V. Yasnov 1058 1375
Regions of Reduced Radiobrightness on the Sun Based on Observations in the 8-mm Range of Radiowavelengths – G. P. Apushkinskii and A. N. Tsyganov 1061 1379
Investigation of Determinated Component of the Total Flux of Solar Radiation – S. A. Andrianov and L. V. Yasnov 1064 1383
Statistical Investigation of the Characteristics of the Slowly Varying Component of Solar Radioemission at a Wavelength of 9 cm – Sh. B. Akhmedov. 1068 1388
The Radioemission Spectrum of the Quiet Sun and Its Relationship to the Cycle of Solar Activity – G. F. Eliseev and L. F. Lazareva 1073 1395
Concerning the Second Harmonic of the Phase Dependence of Lunar Radioemission – L. I. Fedoseev 1076 1398
Variation of the Parameters of the Ionosphere of Mars and of the Conditions Governing Propagation of Radiowaves in It as Functions of the Time of Year, the Phase of Solar Activity, and the Distance from the Planet to the Sun – A. N. Kazantsev. . . . 1079 1401
Concerning the Accuracy with Which the Atmospheres of Planets Are Determined from Phase Radiooccultation Measurements – V. A. Danilin, A. N. Kazantsev, and A. V. Plotnikov. 1082 1405
The Electrical Parameters and Guidance Systems of the RT-25 × 2 Radiotelescope – A. G. Kislyakov, V. I. Chernyshev, A. A. Nosov, and Yu. P. Shandra 1086 1409
The Directivity Characteristics of the RT-25 × 2 Radiotelescope – A. G. Kislyakov, V. I. Turchin, A. L. Fogel', and V. I. Chernyshev 1093 1418
Increasing the Sensitivity of the RT-22 Radiotelescope of the Crimean Astronomical Observatory (CAO) in the 3-cm Range of Wavelengths for a Radiointerferometer Having a Limiting Angular Resolution – L. V. Bakhrakh, M. I. Grigor'eva, V. A. Efanov, L. R. Kogan, V. I. Kostenko, L. I. Matveenko, G. S. Misezhnikov, I. G. Moiseev, Yu. G. Monin, M. M. Mukhina, and V. B. Shteinshleiger 1099 1425
Investigation and Inculcation of Radioastronomical Adjustment for the Large Pulkovo Radiotelescope (LPR) – G. V. Gel'freikh and O. A. Golubchina 1102 1429
Investigation of the Effect of the Ionosphere on the Characteristics of the UTR-2 Radiotelescope – A. V. Men' and A. V. Antonov 1107 1434

A Radiometer for the 3- to 3.8-mm Range with a Switch at the Input – V. M. Voronov and R. Kirakosyan 1111 1439
A Superheterodyne Spectrum Analyzer for the Range of Wavelength from 1.1 to 1.7 mm – Yu. Yu. Kulikov, L. I. Fedoseev, A. A. Shvetsov, and V. R. Amirkhanyan . . . 1113 1442
A Radiometer Operating in the 4-cm Range with an Input Parametric Amplifier Cooled with Liquid Nitrogen – A. B. Berlin, D. V. Korol'kov, G. M. Timofeeva, A. S. Berlin, N. T. Tishchenkov, O. A. Arsen'eva, and R. I. Vergasov 1115 1444
The Use of Pulses with Compensating Delays as Call Signals of the Ceti System – L. M. Gindilis 1118 1448
Concerning the Possibility of Using Cybernetic Methods to Search for Highly Organized Systems in the Universe – B. N. Panovkin 1121 1452

Volume 16, Number 10 October, 1973

The Role of Violation of the Quasineutrality of a Plasma during Its Resonance Acceleration — O. V. Manukhina and A. G. Prudkovskii 1125 1461
Diffraction of Alfvén Waves in a Magnetically Active Plasma — N. S. Bellyustin and V. V. Tamoikin 1130 1467
Frequency Dependence of the Anomalous Absorption of Radio Waves during Sudden Ionospheric Disturbances — V. V. Belikovich and E. A. Benediktov 1136 1475
Investigation of the Inhomogeneous Structure of the Ionosphere According to Frequency-Diversity Reception of Shortwave Signals on the Dushanbe—Gor'kii Route -- V. A. Alimov, L. M. Erukhimov, L. N. Rubtosv, E. V. Struk, and Ya. G. Tsybko 1141 1482
Utilization of the Method of Partial Reflections for the Investigation of the D-Region of the Ionosphere when It Has Been Disturbed by Powerful Radio Waves — V. V. Pisareva and V. A. Ryzhov 1147 1490
Certain Characteristics of Radio Signals Scattered by a Sea Surface in Directions Close to the Direction of Specular Reflection — A. I. Kalmykov, A. S. Kurekin, V. Yu. Levantovskii, I. E. Ostrovskii, and V. V. Pustovoitenko 1153 1498
Effect of the Absorption Band of Molecular Oxygen on the Amplitude Fluctuations of Radio Waves in the Millimeter Range — L. I. Sharapov, A. S. Bryukhovetskii, I. Kh. Vakser, and V. A. Komyak 1158 1504
Applicability of the Phenomenological Equations for a Multimode Laser — A. M. Ratner and A. M. Fisher 1163 1510
Efficiency of Parametric Conversion in High-Q Optical Resonators — M. M. Sushchik and V. M. Fortus 1173 1529
Focusing of Molecular Beams in Bispiral Systems — N. I. Trotsyuk 1180 1530
Establishment of Steady-State Oscillations in Multifrequency Self-Oscillatory Systems under Random Initial Conditions in the Presence of an External Signal — É. S. Vorobeichikov, B. N. Poizner, and T. S. Portnova 1184 1535
Distribution of Fluctuations of Short-Wave (SW) Signals — V. A. Alimov and L. M. Erukhimov 1188 1540
Fluctuations of the Surface Impedance of an Inhomogeneous Absorptive Half-Space — V. G. Bezrodnyi 1198 1552
Fluctuations of the Reversal Point in a Stratified-Inhomogeneous Medium — I. M. Fuks 1203 1558
Reflection and Refraction of Electromagnetic Pulse Signals by the Boundaries of a Moving Conductor and the Conductivity Switching Front — A. V. Manankova 1211 1568
The Method of Partial Intersecting Domains for the Investigation of Waveguide-Resonator Systems Having a Complex Shape — I. G. Prokhoda and V. P. Chumachenko 1219 1578
Method of Calculating Propagation Constants in Crimped Waveguides — A. S. Il'inskii, E. A. Al'khovskii, and A. G. Danilova 1223 1583
Scattering of the Field of a Dipole by a Short Section of a Circular Waveguides — S. I. Lapta and V. G. Sologub 1227 1588

Radiation from Electron Bunches above a Periodic Structure — V. D. Eremka, A. Ya. Kirichenko, and V. F. Protsai. 1236 1599
Experimental Investigation of Adiabatic Electron Guns of Cyclotron-Resonance Masers — E. G. Avdoshin and A. L. Gol'denberg 1241 1605

BRIEF COMMUNCATIONS AND LETTERS TO THE EDITOR
A Certain Form of Glancing Propagation of Radio Waves — M. V. Tinin 1247 1613
Optical Handling of the Results of Radioholographic Measurements of an Antenna Directivity Pattern in Incoherent Light — E. M. Zuikova, L. A. Pasmanik, and V. I. Turchin. 1250 1615
The Phase Picture of Multifrequency Spin Echo — V. S. Grechishkin, V. S. Kirchanov, and E. M. Shishkin. 1254 1618
The Depression Coefficient of the Space-Charge Field in Periodically Separated Electron Beams — G. N. Rapoport and A. T. Fialkovskii 1257 1620

Volume 16, Number 11 November, 1973

Statistical Theory of Light Propagation in a Randomly-Inhomogeneous Medium (Functional Methods) (Review) – V. L. Klyatskin. 1261 1629
Sectorial Structure of Inhomogeneities of the Interplanetary Plasma – N. A. Lotova and N. V. Vereshchagina 1272 1645
Hydrodynamic Instability of Electromagnetic and Plasma Waves at Harmonics of the Gyrofrequency – E. Ya. Zlotnik 1278 1652
Nonstationary Solution of the Diffusion Equation in a Gravitational Field with Allowance for Transfer of Particles and Their Disappearance – V. V. Makeev, V. M. Polyakov, and V. V. Rybin 1284 1660
Interaction of Oppositely Traveling Ultrashort Light Pulses in a Laser with a Clarifying Filter – E. G. Lariontsev and V. N. Serkin 1292 1671
Spectroscopic Investigation of the Rotational Transition J = 21 → 22 in Carbon Monoxide – A. A. Kalinkevich and L.S. Ushakov 1296 1676
Self-Action and Interaction of Waves Having a Continuous Spectrum in Weakly-Nonlinear Media – M. I. Rabinovich and L. E. Shtil'man 1299 1680
Use of the Averaged Variational Principle for Describing Multiwave Interactions of Elastic Surface Waves – V. P. Reutov 1307 1690
Signal Detection by Means of a Parametric Oscillator – G. I. Kravchenko and V. F. Markov 1317 1703
Peculiarities of Synchronous Interaction of the Oscillations of a Self-Oscillatory System Having Two Degrees of Freedom – I. M. Klibanova. 1322 1709
Correlational Handling of Broadband Processes (up to 1.5 MHz) Having Relative Time and Frequency Shifts – G. K. Ivanova, E. F. Orlov, I. S. Rakov, and G. A. Sharonov 1328 1717
Phase Fluctuations of an Optical Wave Which Propagates in a Turbulent Atmosphere – V. P. Lukin and V. V. Pokasov 1335 1726
On the Theory of Periodic Iris-Loaded Waveguides – Yu. P. Shankin 1338 1730
Scattering of a Plane Electromagnetic Wave by a Statistically Inhomogeneous Impedance Plane – G. I. Khudyakov 1342 1736
Resonators and Waveguides Having "Whispering Gallery" Modes for Cyclotron-Resonance Masers – S. N. Vlasov, L. I. Zagryadskaya, and M. I. Petelin. 1348 1743
Nonlinear Phenomena in an Amplifier for Cyclotron-Synchronous Waves – V. A. Vanke and Yu. M. Timofeev 1354 1751
Certain Characteristics of a Glow Discharge with a Cylindrical Hollow Cathode in Helium – V. M. Tkachenko and V. E. Tyutyunnik. 1361 1759

BRIEF COMMUNICATIONS AND LETTERS TO THE EDITOR
The Effect of Polymers on the Concentration of Water-Vapor Dimers in the Earth's Atmosphere near the Saturation Point – V. S. Stankevich 1367 1767
A Certain Method of Equipment Approximation of the Correlation Functions of Stationary Random Processes – I. I. Volkov, V. V. Motov, and S. A. Prokhorov 1370 1770
An Open-Ended Nonsymmetrical Strip Line – A. T. Fialkovskii. 1372 1771
Certain Results of an Experimental Investigation of Low-Voltage Microwave Vacuum Electron Devices – S. G. Afanasov, I. Ya. Ashbel', B. M. Zhulkovskii, V. I. Kochetkov, S. G. Petrov, and V. I. Cherednik 1374 1773
ERRATA 1377 1776

Volume 16, Number 12 December, 1973

Polarization Transfer in a Statistically Inhomogeneous Cosmic Plasma — L. M. Erukhimov and P. I. Kirsh 1379 1783
The Problem of Faraday Depolarization of the Integral Radio Emission from Discrete Sources — Yu. V. Tokarev 1384 1789
The Effect of Diffraction of Radio Waves by Inhomogeneities of the Interplanetary and Interstellar Plasma on the Resolving Power of Interferometers with Ultralong Bases — V. I. Shishov 1390 1796
The Effect of Faraday Rotation on Measurements of the Visibility Function of Cosmic Radio Sources — E. N. Vinyaikin 1394 1800
The Temperature Gradient in H II Regions — T. B. Pyatunina 1397 1804
Variations of the Integral Radio Emission from Mars during the Period between the Oppositions of 1971 and 1973 — V. D. Krotikov and O. B. Shchuko 1403 1811
Results of Measuring the Total Vertical Absorption in the Atmosphere at a Wavelength of 6 mm — D. A. Dmitrenko, L. V. Dmitrenko, N. A. Dugin, Yu. V. Lebskii, L. K. Siz'mina, and A. L. Fogel' 1407 1816
The Effect of the Form of the Amplitude Distribution on the Antenna Aperture on Its Average Characteristics under the Conditions of a Turbulent Troposphere — A. A. Stotskii and V. I. Oboznaya 1413 1823
The Dependence of Polarized Emission from Local Sources on the Sun on the Stage of Development in the Active Region — Sh. B. Akhmedov and N. G. Peterova 1418 1830
The Connection between X-ray and Radio Emission from Active Regions on the Sun for an Inhomogeneous Model — A. S. Grebinskii. 1422 1835
Investigation of the Directivity of Radio Emission from Local Sources on the Sun with Allowance for the Evolution Effect — A. S. Grebinskii and O. V. Korobchuk . . . 1427 1842
The Limiting Sensitivity of Radio Telescopes in Investigations of Inhomogeneities of Distributed Emission — A. G. Kislyakov and A. A. Shvetsov. 1433 1846
A Radio Interferometer Operating at a Frequency of 85.5 MHz with Retranslation — G. I. Dobysh, Yu. P. Ilyasov, B. K. Izvekov, V. T. Solodkov, S. A. Sukhodol'skii, V. A. Frolov, and V. Ya. Shcherbinin. 1438 1853
Analysis of the Accuracy of Measuring the Base of an Interferometer — B. A. Dubinskii 1442 1857
Concerning the Theory of Measuring the Position of a Noise Radio Source by Means of an Interferometer with a Synthesized Aperture — V. V. Sazonov and V. V. Karavaev. 1446 1861
Procedure and Equipment for Observation of Pulsars in the Decameter Range of Wavelengths — Yu. M. Bruk and B. Yu. Ustimenko 1450 1867
A Three-Channel Radiometer Operating at Fixed Frequencies from 102 to 408 MHz — P. A. Kapustin and A. A. Petrovskii 1453 1871
A Procedure for Measuring the Phase Stability of Independent Heterodynes — Yu. P. Kuznetsov, T. G. Kuznetsova, Yu. A. Kukharenko, and A. N. Shamshev 1455 1874

Radiometric Method of Measuring Small Attenuations — V. Ya. Gol'nev, D. V. Korol'kov, and G. M. Timofeeva 1460 188
Features of Designing a Multifrequency Receiver for the Siberian Solar Radio Telescope — V. S. Dekhtyarev, G. T. Kas'yanov, V. V. Kotovich, A. Ya. Smol'kov, and A. V. Storozhko 1463 188
System for Automatic Handling of the Results of Observations of Linear Polarization of Distributed Cosmic Radio Emission — S. P. Chekalev, A. A. Mel'nikov, L. Z. Pososhenko, V. V. Khrulev, and S. A. Shmulevich 1467 188
Problems in the Further Improvement of the Efficiency of Radio Telescopes Having a Diameter of 64 to 128 m in the Short-Wave Portion of the Centimeter Range — A. F. Bogomolov and B. A. Poperechenko. 1471 189
Information and the Efficiency of Using Radio Telescopes — V. A. Dubinskii 1476 189
Multiband Exciters for Solar Radio Telescopes — V. M. Vyatkina and V. G. Ioganson . . 1479 190
A Radio Telescope for the Meter Range of Wavelengths with a Filled Aperture — V. V. Vitkevich, Yu. P. Ilyasov, and S. M. Kutuzov. 1482 190
The Mirror Scheme of the RT-70 Radio Telescope — A. N. Kozlov, V. B. Tarasov, V. N. Titov, V. A. Grishmanovskii, G. N. Kolcheev, P. D. Kalachev, B. S. Kovobov, and I. N. Knyazev. 1486 190
